Knowledge

COMMON PROCUREMENT VOCABULARY (CPV)

DESCRIPTION & STRUCTURE OF CPV CODES

CPV codification is based on a tree structure comprising codes of up to 9 digits associated with a wording that describes the supplies, works or services that a supplier provides.

The numerical code consists of 8 digits, subdivided as follows:

- The first two digits identify the divisions (XX000000-Y),
- The first three digits identify the groups (XXX00000-Y),
- The first four digits identify the classes (XXXX0000-Y),
- The first five digits identify the categories (XXXXX000-Y).

A ninth digit serves to verify the previous digits.

Each of the last three digits gives a greater degree of precision within each category
